

Wei Wan, Ph.D.
Licensing Associate
(979) 862-1933
wwan@tamu.edu

Dr. Wei Wan is a Licensing Associate for Texas A&M Technology Commercialization (TTC). She is a registered USPTO patent agent with over 20 years university research and teaching experience. She authored or co-authored 15 peer reviewed papers, applied and received multiple grants, and self-drafted and prosecuted 5 US and international patents.

Wei received her Ph.D. from University of California-Davis. Her graduate research with National Academy of Science member, Prof. Tilahun Yilma, was on viral infectious diseases and vaccine development. Her later research with Prof. Martin Privalsky was on signal transduction and transcriptional factors. She continued her research on a broad spectrum of different fields in biological science and chemical-biology interdisciplinary areas. She also taught college level courses including Botany, Genetics, Cell and Molecular Biology, Microbiology, Virology, Immunology, Biochemistry, and General Biology.

She is actively involved in K-12 science education programs including Science Olympiad and Junior Academy of Science.

In her spare time, Wei enjoys music, reading, gardening, community service, and spending time with friends and family.
